1. Introduction

NOTE:

*This module requires Magento Power Toys main module.
See section 2 for full installation requirements & guide.*

[JaJuMa Power Toys](#) for Magento 2 by [JaJuMa](#) is a framework for tools and helpers , a.k.a "Toys", for Magento Admins to tune and streamline their Magento experience for greater productivity.

Weather Power Toy for Magento 2 is a Dashboard toy providing current weather, air quality as well as weather forecast in your Magento store.

2. Installation

For installing the extension, follow installation process as with any Magento Extension. This module requires

- [Magento Power Toys](#) v1.0.0+
- [Magewire](#) v1.10+ & [Magewire-requirejs](#) v1.1+

We recommend installation via composer that will handle these dependencies automatically. In case of manual installation, please make sure to install these modules first.

2.1. Extension Installation via composer

For installing the extension via composer, follow installation process as with any Magento Extension from Magento Marketplace. See: <https://devdocs.magento.com/extensions/install/>

2.2. Manual Extension Installation via FTP

For manual installation by FTP, please follow these steps:

Before Installing

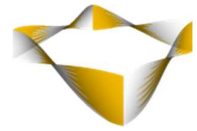

1. We recommend you to duplicate your live store on a staging/test site and try installation on your staging/test site before deploying to your live store
2. Backup Magento files and the store database

Please Note: It's very important to backup all themes and extensions in Magento before installation, especially when you are working on a live server. We strongly recommend you to do not skip this step.

Upload the Extension

1. Log into your hosting space via a FTP client (e. g. FileZilla, WinSCP, cuteFtp)
2. Create Folder: <magentoroot>/app/code/Jajuma/PotWeather
3. Unzip extension package and upload files into:
<magentoroot>/app/code/Jajuma/PotWeather
4. Enter and run the following commands at the command line:

```
php bin/magento setup:upgrade  
php bin/magento setup:static-content:deploy
```

3. Extension Scope

This Dashboard Power Toy displays:

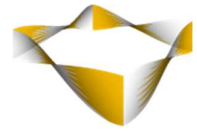

- Current weather at your/configured location
- Current air quality at your/configured location and
- Weather forecast for your/configured location

Furthermore:

- Location can be configured or determined by IP
- Support metric and imperial units
- Comes with light mode and dark mode

NOTE:

*This module requires Magento Power Toys main module.
See section 2 for full installation requirements & guide.*

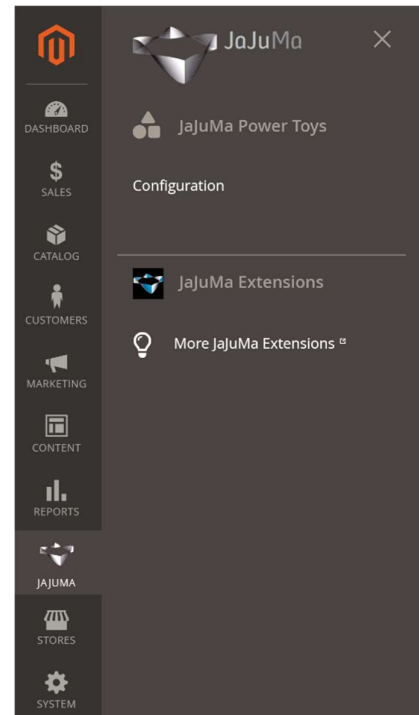

4. Configuration

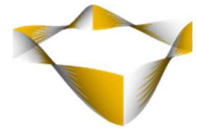

In Magento Backend see

JaJuMa -> Power Toys -> Configuration

to enable or disable the extension and
configure the extension in tab

-> Weather

4.1. Weather Power Toy Settings

The configuration in

JaJuMa -> Power Toys -> Configuration -> Weather

provides the option to Enable/Disable the toy/extension.

With **Enabled** =

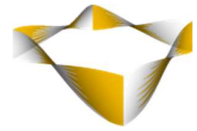

- Yes → Toy is enabled
- No → Toy is disabled

As well as configure your

- **Type Location:**
 - Fixed: Address as configured below
 - Dynamic: Address as determined based on your IP
- **Address Name:** Your fixed location, with search suggest on input
- **Skin:** Dark mode or Light mode for this Toy
- **Units:** Use Metric or Imperial values

The screenshot shows a configuration window titled "Weather" with a close button in the top right corner. It contains five settings, each with a label, a sub-label "[store view]", and a dropdown menu:

- Enable** [store view]: Yes
- Type Location** [store view]: Fixed
- Address Name** [store view]: Stuttgart, Baden-Württemberg, Germany
Search address by city or place
- Skin** [store view]: Dark
- Units** [store view]: Metric C°

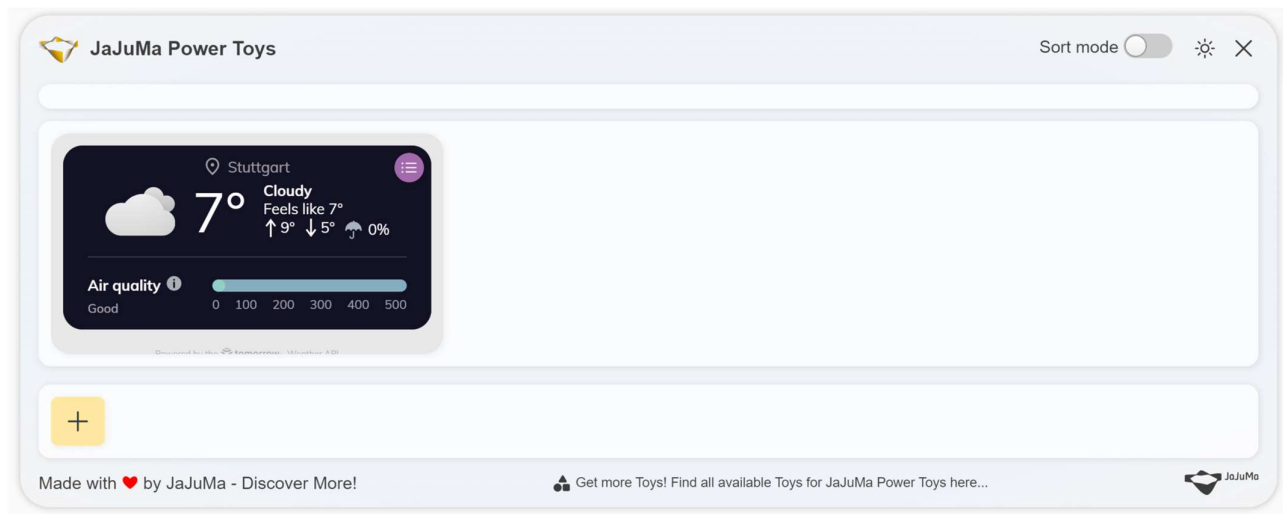

5. Using Weather Power Toy

After enabling & configuring the toy, open the Power Toys panel and see Dashboard Toy “Weather”

The Toy displays:

- Current weather at your/configured location
- Current air quality at your/configured location and
- OnHover purple list icon: Weather forecast for your/configured location
