1. Introduction

NOTE:

*This module requires Magento Power Toys main module.
See section 2 for full installation requirements & guide.*

[JaJuMa Power Toys](#) for Magento 2 by [JaJuMa](#) is a framework for tools and helpers , a.k.a "Toys", for Magento Admins to tune and streamline their Magento experience for greater productivity.

Chat GPT Power Toy for Magento 2 is a quick action toy that allows using ChatGPT from Magento backend..

2. Installation

For installing the extension, follow installation process as with any Magento Extension. This module requires

- [Magento Power Toys](#) v1.0.0+
- [Magewire](#) v1.10+ & [Magewire-requirejs](#) v1.1+

We recommend installation via composer that will handle these dependencies automatically. In case of manual installation, please make sure to install these modules first.

2.1. Extension Installation via composer

For installing the extension via composer, follow installation process as with any Magento Extension from Magento Marketplace. See: <https://devdocs.magento.com/extensions/install/>

2.2. Manual Extension Installation via FTP

For manual installation by FTP, please follow these steps:

Before Installing

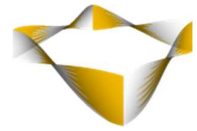

1. We recommend you to duplicate your live store on a staging/test site and try installation on your staging/test site before deploying to your live store
2. Backup Magento files and the store database

Please Note: It's very important to backup all themes and extensions in Magento before installation, especially when you are working on a live server. We strongly recommend you to do not skip this step.

Upload the Extension

1. Log into your hosting space via a FTP client (e. g. FileZilla, WinSCP, cuteFtp)
2. Create Folder: <magentoroot>/app/code/Jajuma/ PotChatGpt
3. Unzip extension package and upload files into:
<magentoroot>/app/code/Jajuma/ PotChatGpt
4. Enter and run the following commands at the command line:

```
php bin/magento setup:upgrade  
php bin/magento setup:static-content:deploy
```

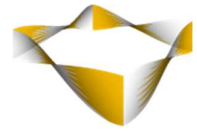

3. Extension Scope

This Quick Action Power Toy provides:

- ChatGPT chats from Magento backend

NOTE:

*This module requires Magento Power Toys main module.
See section 2 for full installation requirements & guide.*

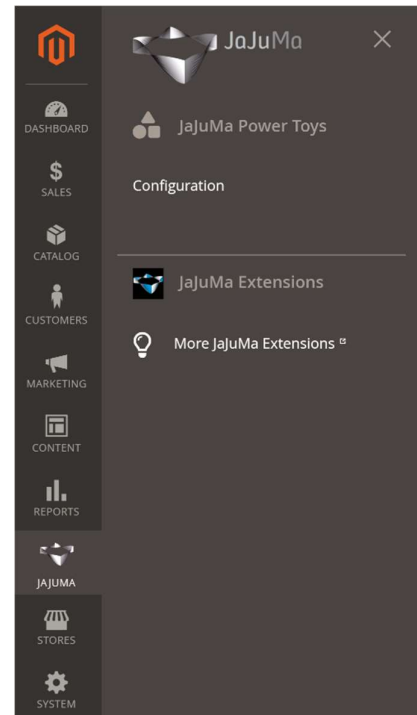

4. Configuration

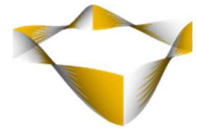

In Magento Backend see

JaJuMa -> Power Toys -> Configuration

to enable or disable the extension and
configure the extension in tab

-> Chat GPT

4.1. Chat GPT Power Toy Settings

The configuration in

JajuMa -> Power Toys -> Configuration -> Chat GPT

provides the option to Enable/Disable the toy/extension.

With **Enabled** =

- Yes → Toy is enabled
- No → Toy is disabled

As well as configure your

- **API Key**

5. Using Chat GPT Power Toy

After enabling and configuring the toy, open the Power Toys panel and see button “Chat GPT”.

When click this button, the Chat GPT chat popup will open and allow you to chat with ChatGPT using configured model.

6. Support

Please feel free to contact JaJuMa support team via support@jajuma.de.

In case any additional information is required. We'd be more than happy to assist in setting up the extension.
