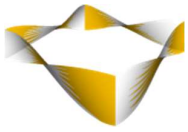
1. Introduction

JaJuMa Shariff Social Share enables Magento 2 stores to allow users to share content without compromising their privacy on numerous social network and social sharing services.

The extension comes with configuration options on sharing button styles, shape as well as colors. It also allows to configure custom styles and of course also which social sharing services to be used from backend.



2. Installation

Follow installation process as with any Magento Extension

2.1. Extension Installation via Composer

For installation via composer, please follow this guide as with any extension from Magento Marketplace: https://devdocs.magento.com/extensions/install/

2.2. Manual Extension Installation via FTP

For manual installation by FTP, please follow these steps:

Before Installing

1. We recommend you to duplicate your live store on a staging/test site and try installation on your staging/test site before deploying to your live store
2. Backup Magento files and the store database

Please Note: It's very important to backup all themes and extensions in Magento before installation, especially when you are working on a live server.
We strongly recommend you to do not skip this step.

Upload the Extension

1. Log into your hosting space via a FTP client (e. g. FileZilla, WinSCP, cuteFtp)
2. Create Folder: <magentoroot>/app/code/jajuma/WebpImages
3. Unzip extension package and upload files into: <magentoroot>/app/code/jajuma/WebpImages
4. Enter and run the following commands at the command line:

```
php bin/magento setup:upgrade
php bin/magento setup:static-content:deploy
```

3. Configuration

In Magento Backend see

Stores -> Configuration -> Open Tab: JaJuMa -> Select: Shariff Social Share

For JaJuMa Shariff Social Share configuration with 4 sections:
